

The figure is a scatter plot with a green shaded region representing the training data. The x-axis is labeled 'training data' and ranges from -400 to 200. The y-axis is labeled 'performance' and ranges from 0.0 to 1.0. The green shaded region starts at approximately (-400, 0.0) and extends diagonally upwards to the right, ending at approximately (200, 1.0). The region is bounded by a solid green line on the left and a dashed green line on the right. The plot shows a positive correlation between the number of training data points and the performance metric.
